

Power Distribution Unit with monitoring and control

MDS-PDU-001

Cabinet power distribution units (PDU's) and environmental monitoring products combine the key functions a data center or remote site manager needs to manage each equipment cabinet, reduce downtime and improve equipment power management.

Features

- Remotely Control Individual Receptacles - turn on, off or cycle power to reboot equipment
- IP Access & Security: Web interface, SSL, SSH, Telnet, SNMP or RS-232 access
- User defined thresholds for alarm conditions - current & temp/humidity
- Power up sequencing to avoid in-rush current
- Load-shedding - shutdown less critical equipment during alarm conditions to keep critical equipment up and running
- Environmental Monitoring: Temperature/Humidity Sensors for monitoring via web interface
- UL60950-1 Agency Approvals
- IEC 60320 C20 Inlet Input Cord
- IEC 60320 C13 Equipment Cords

Electrical Specs

- Operating voltage: 208 - 240 VAC, 50 Hz
- Maximum load 20A
- Outlets: 16
- Operating temperature: 0 to +40 degrees Celsius
